

Research Seminar

Deep Learning Tutorial: A Demonstration of Building A Deep Learning Network Using TensorFlow

Date : **2 November 2017 (Thursday)**

Time : 2:30pm – 4:00pm

Venue : M06

Language : Mandarin

Speaker : **Mr. Yalong Jiang**

(The Hong Kong Polytechnic University)

Deep learning attracts lots of attention recently. Deep learning architectures such as deep neural networks, deep belief networks and recurrent neural networks have been applied to fields including computer vision, speech recognition, audio recognition, and machine translation. TensorFlow was developed by the Google Brain team for internal Google use and was released under the Apache 2.0 open source license on 9 November 2015. This seminar will take you into the world of deep learning and give you a demonstration of how to build a deep learning network with Tensor Flow step by step.
